PROFILE SUMMARY

Final-year B.Sc. Computer Technology student with hands-on experience building full-stack web applications and cross-platform mobile apps. Comfortable across the stack — from responsive React front-ends to Node.js/Express APIs backed by MySQL and Firebase. Strong focus on clean, complete, production-ready code.

EDUCATION

B.Sc. Computer Technology
Nandha Arts and Science College

Final Year — Expected 2027

TECHNICAL SKILLS

Languages & Markup	HTML, CSS, JavaScript, TypeScript
Frontend	React, Vite, Tailwind CSS, Framer Motion
Backend	Node.js, Express.js, JWT Authentication
Database & Storage	MySQL, Firebase Storage
Tools	Git & GitHub

PROJECTS

MediScan AI	<i>React, Node.js, Express.js, MySQL, Firebase Storage</i>
- Built a web application that lets users upload medical reports/prescriptions and uses AI-assisted scanning to extract and organize health data. - Designed secure JWT-based authentication and a MySQL schema to store patient records and scan history. - Implemented image/document upload and storage using Firebase Storage with a responsive React front-end.	
Safe Drive AI	<i>React, TypeScript, Node.js, Express.js, MySQL</i>
- Developed a driver-safety monitoring application that tracks and analyzes driving behaviour to flag risky patterns. - Built REST APIs with Express.js and MySQL to log trip data and generate safety scores/alerts. - Created an interactive, responsive dashboard in React with TypeScript for real-time trip and safety insights.	
E-Commerce Platform	<i>React, Vite, Tailwind CSS, Node.js, Express.js, MySQL, JWT</i>
- Built a full-stack e-commerce site with product catalog, cart, and checkout flow using React, Vite and Tailwind CSS. - Implemented JWT-based user authentication and an Express.js/MySQL backend for products, orders and users. - Focused on a clean, mobile-responsive UI with smooth interactions using Framer Motion.
